It worked when we cleaned dishes, but left a trail of water behind and was extremely noisy when plugged in. My landlord did not fix it until the first time I actually needed it for a dishwasher! He did install an inlet, which is a huge improvement, but he just fixed the stopper. This is not a very quick fix, but at least it is easy to install and use. While I was, I became very handy at fixing my own sink with a sawzall. I can turn it on, rinse a glass, flip the cup and dish over, and flip it off. The stopper's even very handy when fixing leaks in the sink! It doesn't go down really deep, but it is perfect for my collection of mugs. It is also a very wide strainer, which fits a lot of mugs at once and is also very easy to grip and pull down. The strainer is quite high, but that is no problem for me as I am not usually using a mug rack. Mugs do slide around, but my stove top is actually made to hold mugs, so this is no problem. I don't have a lot of mugs, but it is still handy. I know a lot of people use dish racks but I find them very limiting. This strainer can take five mugs at a time and doesn't break any mug. It is also secure, it has a handle to hold onto, and you can place the strainer over your cupboard or countertop to have 3da54e8ca3
