The Blue Tongue is a team of mercenaries hired by the U.S. government in the aftermath of a viral outbreak that has spread around the world. As a result, the government has a surplus of security officers, and these men and women are hired at a hefty price – a new contract is 1000 times more than usual, so you get the blue tongued mercenary that many have heard of. There are four game-changing new features that make this the ultimate zombie shooter. The first is the new hit counting system. You'll want to make sure that you are on as many hits as you can, because when you play through a match, players will be awarded for each zombie head they catch or eliminate. It's hard to not fall in love with the game after playing through the campaign with such a great addition. The second new feature is the new melee character. In this version of the game, melee players can pick up and use any weapon lying on the ground. Whether it's a baseball bat, flamethrower or fire axe, they can be used to inflict massive damage on zombies. It's an essential part of the game, and you'll have an arsenal at your disposal that you can show off to your friends. The third new feature has to do with perks. Every time you kill a zombie, you are awarded a point. The next time you spawn, you'll be given the ability to pick up all of your dropped weapons, which means you will always have enough weapons for the mission. It's also the perfect incentive to play the game all the way through once. The last new feature has to do with the realm of information. In order to participate in the game, you'll need to sign up for the service, and all information for the player is kept on the servers. The servers also keep track of data about player activity, and can be accessed through the website. You've been playing video games for years now. Well, aren't you glad you waited to play on the PC with all the new features? The game is extremely hard to get, and it may take up to a month to get it. The anti-piracy measures of the mod have been engineered to become the standard, and no other gamer can obtain the game without taking the challenges. Hopefully, with the Blue Tongue 2 coming out on the PC, you won't have to worry about the restrictions
